

SENSING OUR WORLD 2016:

Teacher Recommendation

STUDENT'S NAME _____

This student is applying to participate in a week-long science program at Notre Dame for students aged 11-14. All projects require a certain amount of maturity. *Sensing Our World* participants learn about the physical and chemical properties of materials, explore various issues, and prepare and present oral reports.

Please review this student's records and give us your candid opinion about the suitability of the student for this program. This information will be treated in strictest confidence. Please do not return this Teacher Recommendation form to the student, rather, return this form separately by mail to the address below, or you may FAX it to us. We appreciate your cooperation.
